ITEMS THAT VIOLATE POLICY
(DO NOT BRING)
Any open-coiled appliance, air conditioners, candles, electric blankets, electric stoves, grills of any kind, plug-in air fresheners, space heaters, and toasters or ovens.
CHECKLIST FOR A SUSTAINABLE MOVE-IN

At Virginia Tech we are committed to packing smart and sustainable for each academic year. Check out the tips below to see how you can be a more sustainable Hokie!

**√ DITCH THE CARDBOARD & REUSE**

Consider packing your items in reusable boxes or in laundry baskets or in reusable bags that you could use again during move-out. This can save you money and space in your room.

**√ WAIT ON BIG PURCHASES**

Wait until you get to your room until you make big purchases. You will be able to see how much space that you have in your room. Make sure to check out Y-Toss when you arrive to campus and purchase discounted items such as mini fridges.

**√ RECYCLABLE PACKAGING**

Stocking up on items for your room that are disposable? Purchase items that are packaged in recyclable packaging (#1 or #2 plastic OR cardboard packaging).

**√ DRYING RACK FOR CLOTHING**

Want to save some cash and help the environment? Invest in a drying rack for you clothing. Laundry costs $1.75 per cycle. On average, this could save you $60-$120 per academic year.

**√ CFL OR LED BULBS FOR LAMPS**

Bringing a lamp to brighten up your room? Consider using a CFL or LED bulb for your lamp. These light bulbs use up to 70% less electricity and that means less money spent on lightbulbs! Sounds like a bright idea!
